

Chart Watch

The comments are no longer included in the charts.

- 1 Shanghai Index up by 4% over the last week
- 8 Canadian oil priced at wide differentials last week
- 12 Trump calls on OPEC to lower oil prices
- 34 YTD, US gas production has grown by ~13%
- 40 Canadian gas rigs dropped by 16 to 62 last week

information on this publication and the Institute

Broad market indices are one the many vital signs measuring the health of the economy. Energy demand is a function of economic health. Source: Bloomberg, ARC Financial Corp.

The performance of Canadian oil and gas service equities are plotted in tandem with the corresponding US index.

Source: Bloomberg, Petroleum Services Association of Canada

Performance of Canadian and US oil & gas equities are compared against each other.

Source: Bloomberg, ARC Financial Corp.

Much of Canada's oil and gas production is sold in US dollars. As such, the exchange rate significantly impacts corporate revenues and profits.

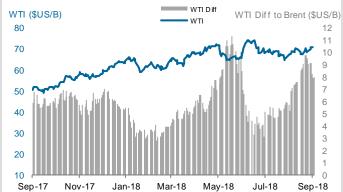

Source: Bloomberg

Please see Advisories and Disclaimers at the end of the publication for important cautionary advisory and disclaimer language

Crude Oil

North American crude oil prices can sometimes disconnect from global prices depending on regional supply and demand dynamics.

Source: Bloomberg

7 Canadian Heavy Oil Price Differential to WTI Western Canadian Select (WCS) Differential; Rolling 12-Month History

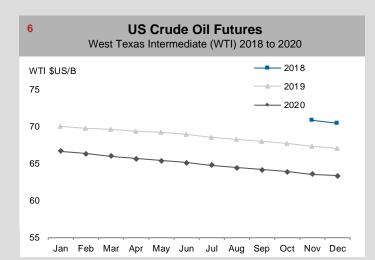

The differential should reflect quality differences and transportation costs. Greater discounts can result from infrastructure or refinery outages.

Source: Bloomberg

9 Canadian Crude Oil Exports by Rail Monthly; 2012 to Present MB/d 250 200 150 100 50 2012 2013 2014 2015 2016 2017 2018

Rail is expected to grow as the pipelines have hit the limit for moving additional barrels of crude oil, and supply is still growing.

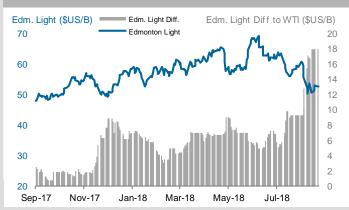

Source: National Energy Board

Forward prices for WTI are plotted against months in the calendar year. Years are distinguished by color and symbol coding.

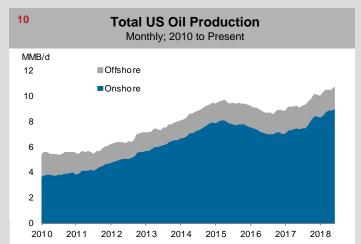

Source: Bloomberg

8 Canadian Light Crude Oil Price Differential to WTI WTI and Edmonton Light differential; Rolling 12-Month History

The differential should reflect the transportation cost from Alberta to Cushing. Greater discounts can result from infrastructure or refinery outages.

Source: Bloomberg

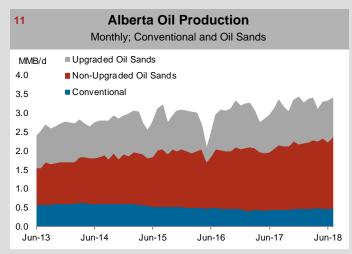

The advancement of drilling and completion methods is increasing US crude oil production.

Source: Bloomberg, U.S. Energy Information Administration

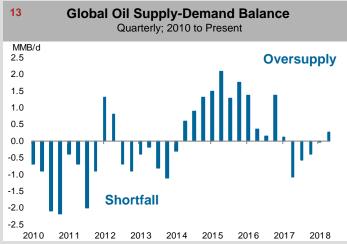

Crude Oil

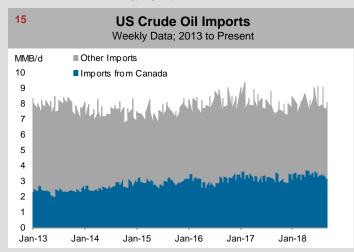

Most of Canada's oil production comes from Alberta; split between oil sands and conventional production.

Source: Alberta Energy Regulator

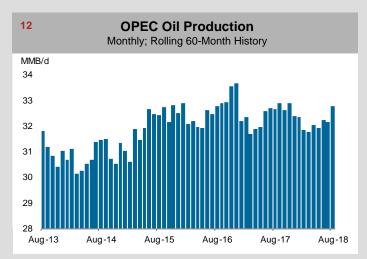

Negative numbers indicate a global crude shortfall, while positive numbers indicate an oversupply.

Source: International Energy Agency

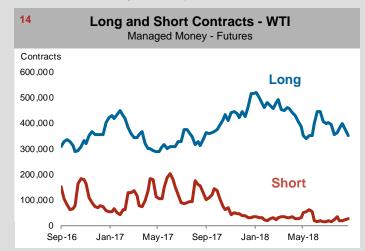

Crude oil imports from Canada are taking market share from overseas imports.

Source: U.S. Energy Information Administration

OPEC's production levels relative to its sustainable and spare capacity influences global crude prices.

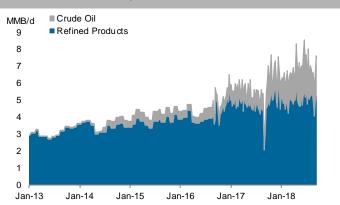

Source: Petroleum Intelligence Weekly

Long contracts take the position that WTI oil price will increase, while short contracts expect a decline.

Source: Bloomberg, U.S. Commodity Futures Trading Commission

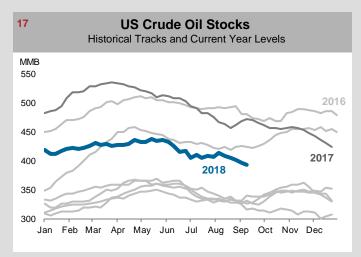

The US exports more refined products than crude oil. With the rapid growth of tight oil, most export growth should come from crude oil exports.

Source: U.S. Energy Information Administration

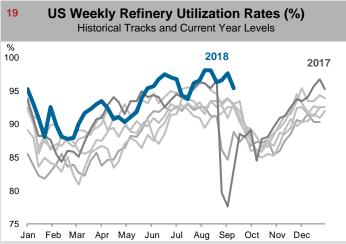

Crude Oil

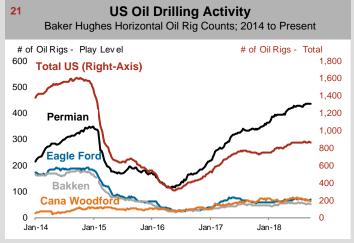

US crude oil stock levels can affect crude oil prices. Stock levels for the current year are represented by the blue line.

Source: U.S. Energy Information Administration

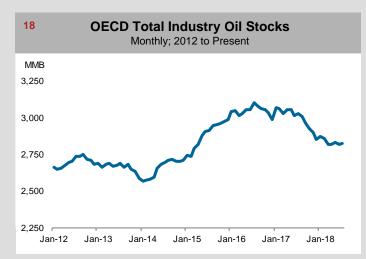

Refinery utilization rates change the supply of refined products, impacting price. Utilization for the current year is blue.

Source: U.S. Energy Information Administration

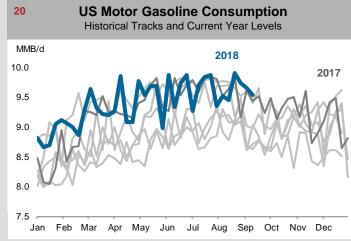

Tracking US oil drilling by major play provides insight into the composition of US oil supply and growth trends.

Source: Baker Hughes

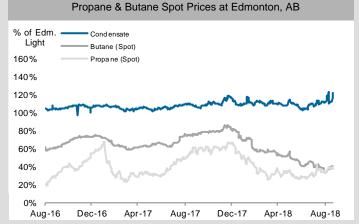

OECD stock levels can affect crude oil prices.

Source: International Energy Agency

Gasoline consumption accounts for almost half of all oil use in the US Gasoline consumption for the current year is represented by the blue line. Source: U.S. Energy Information Administration

Daily NGL Prices as a % of Edmonton Light

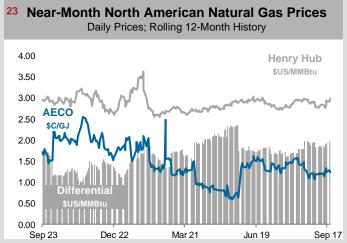

Natural gas liquids have become critical contributors to producer's cash flow. Prices are influenced by the price of oil as well as local supply and demand.

Source: Bloomberg, ARC Financial Corp.

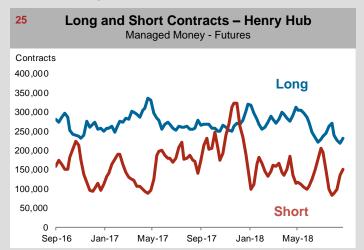

Natural Gas

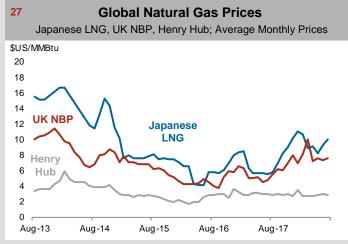

Near-month prices at AECO track Henry Hub prices, the exchange rate and the cost of transportation. Local factors can also affect price.

Source: Bloomberg

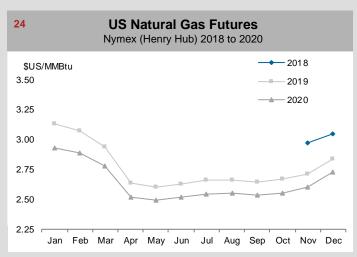

Long contracts take the position that Henry Hub gas price will increase, while short contracts expect a decline.

Source: U.S. Commodity Futures Trading Commission

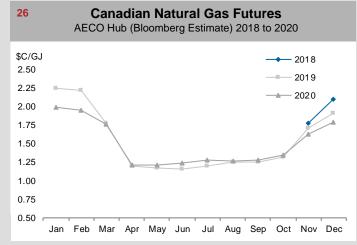

International natural gas prices strongly impact the economics of proposed LNG projects.

Source: Bloomberg, Japanese Ministry of Economy, Trade and Industry

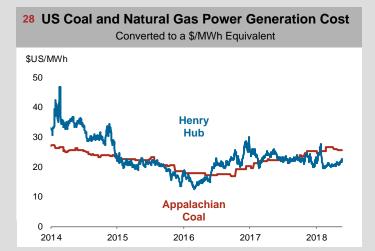

Forward contract prices are plotted against months in the calendar year. Years are distinguished by color and symbol coding.

Source: Bloomberg

AECO forward prices mimic Henry Hub futures minus a differential.

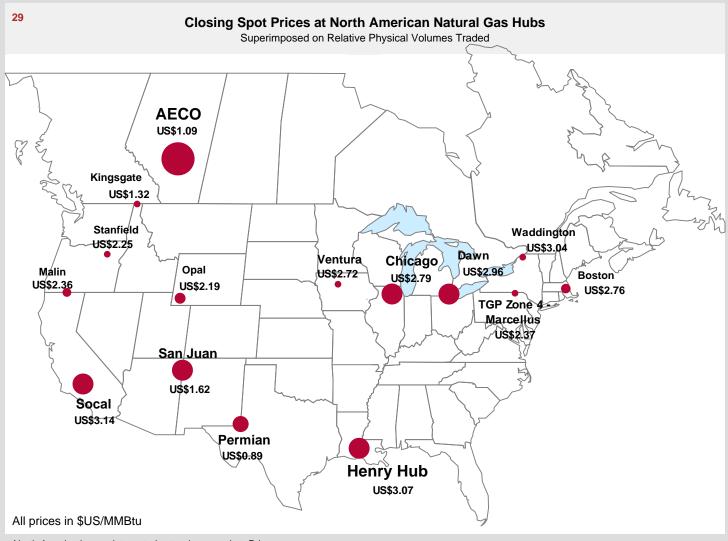

Source: Bloomberg

This graph illustrates when it may be economic to begin coal-gas switching in power generation. Average power plant efficiencies are assumed.

Source: Bloomberg

Natural Gas

North America has an integrated natural gas market. Prices are determined by regional supply and demand, and pipeline flows. Source: Bloomberg

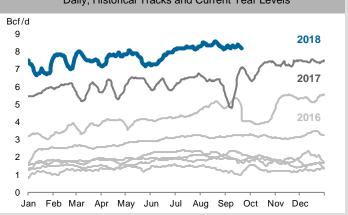

Pipeline Flows Out of Western Canada Daily; Historical Tracks and Current Year Levels Bcf/d 12 2017 11 2018 7

The ability of gas producers to move gas out of the WCSB to eastern markets and the US is a major factor in local natural gas prices.
