Chart Watch

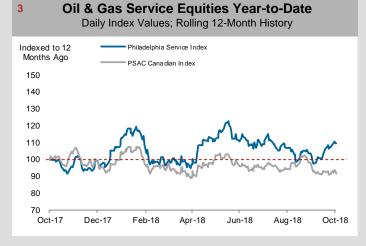

- 7 The WTI WCS diff reached a record high
- 10 US oil production grew 269 MB/d in July
- **11** Oil sands production surpassed 3 MMB/d in Aug
- 29 Spot AECO hit its highest since January

34 US gas production in Sept was up 10.2 Bcf/d YoY

Spot WTI Crude	Edmonton Light	Spot Henry Hub	Spot AECO	Spot AECO Basis	Currency
\$US/B	\$US/B	\$US/MMBtu	\$Cdn/GJ	\$US/MMBtu	\$US/\$Cdn
74.34 个	50.05 🗸	3.39 ↑	2.50 个	1.35 ↓	0.7729 个

Broad market indices are one the many vital signs measuring the health of the economy. Energy demand is a function of economic health. *Source: Bloomberg, ARC Financial Corp.*

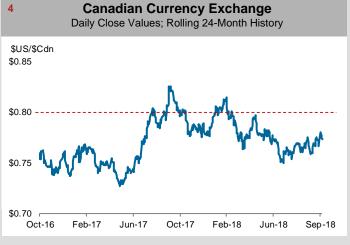

The performance of Canadian oil and gas service equities are plotted in tandem with the corresponding US index. Source: Bloomberg, Petroleum Services Association of Canada

2 Performance of Oil and Gas Equities Year-to-Date Daily Index Values; Rolling 12-Month History

Performance of Canadian and US oil & gas equities are compared against each other.

Source: Bloomberg, ARC Financial Corp.

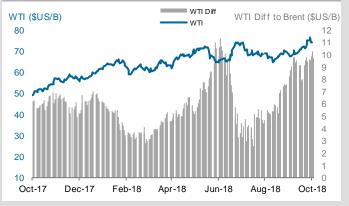

Much of Canada's oil and gas production is sold in US dollars. As such, the exchange rate significantly impacts corporate revenues and profits. Source: Bloomberg

Crude Oil

5 WTI Crude Oil Price and Differential to Brent Near-Month WTI and Brent Differential; Rolling 12-Month History

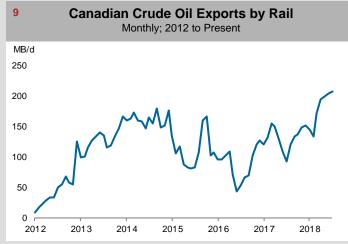

North American crude oil prices can sometimes disconnect from global prices depending on regional supply and demand dynamics. *Source: Bloomberg*

7 Canadian Heavy Oil Price Differential to WTI Western Canadian Select (WCS) Differential; Rolling 12-Month History

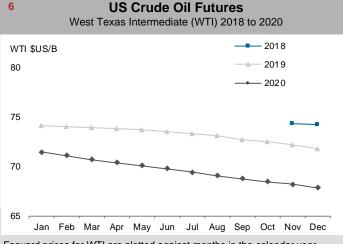

The differential should reflect quality differences and transportation costs. Greater discounts can result from infrastructure or refinery outages. Source: Bloomberg

Rail is expected to grow as the pipelines have hit the limit for moving additional barrels of crude oil, and supply is still growing.

Source: National Energy Board

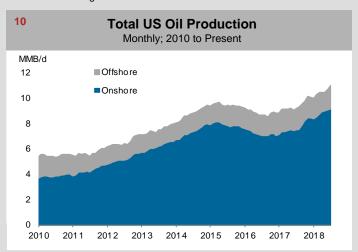

ARC Energy Charts

Forward prices for WTI are plotted against months in the calendar year. Years are distinguished by color and symbol coding. Source: Bloomberg

8 Canadian Light Crude Oil Price Differential to WTI WTI and Edmonton Light differential; Rolling 12-Month History

The differential should reflect the transportation cost from Alberta to Cushing. Greater discounts can result from infrastructure or refinery outages. Source: Bloomberg

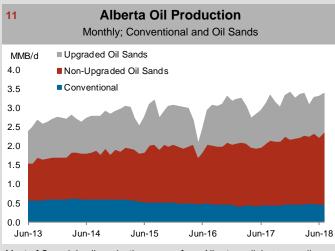

The advancement of drilling and completion methods is increasing US crude oil production.

Source: Bloomberg, U.S. Energy Information Administration

Crude Oil

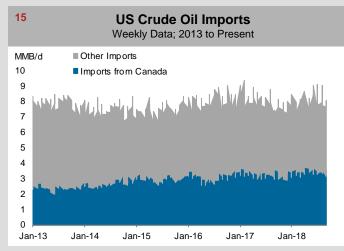

ARC energyresearch institute

Most of Canada's oil production comes from Alberta; split between oil sands and conventional production. Source: Alberta Energy Regulator

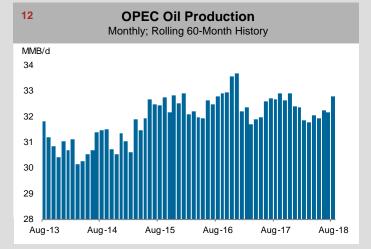

13 **Global Oil Supply-Demand Balance** Quarterly; 2010 to Present MMB/d 2.5 **Oversupply** 2.0 1.5 1.0 05 0.0 -0.5 -1.0 -1.5 Shortfall -2.0 -2.5 2010 2011 2012 2013 2014 2015 2016 2017 2018 Negative numbers indicate a global crude shortfall, while positive numbers indicate an oversupply.

16 US Exports of Crude Oil and Refined Products Weekly Data; 2013 to Present

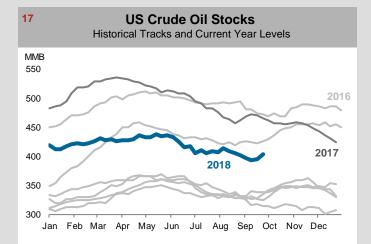

The US exports more refined products than crude oil. With the rapid growth of tight oil, most export growth should come from crude oil exports. *Source: U.S. Energy Information Administration*

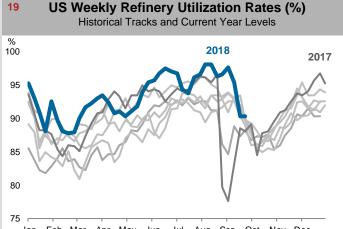

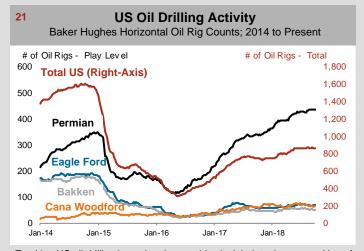

Crude Oil

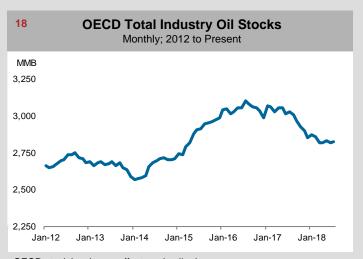

US crude oil stock levels can affect crude oil prices. Stock levels for the current year are represented by the blue line. Source: U.S. Energy Information Administration

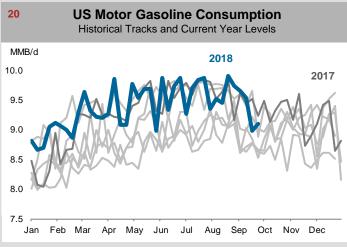

Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec Refinery utilization rates change the supply of refined products, impacting price. Utilization for the current year is blue. Source: U.S. Energy Information Administration

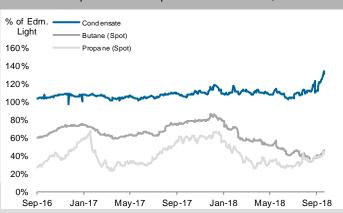

Tracking US oil drilling by major play provides insight into the composition of US oil supply and growth trends. Source: Baker Hughes

OECD stock levels can affect crude oil prices. Source: International Energy Agency

Gasoline consumption accounts for almost half of all oil use in the US. Gasoline consumption for the current year is represented by the blue line. *Source: U.S. Energy Information Administration*

Natural gas liquids have become critical contributors to producer's cash flow. Prices are influenced by the price of oil as well as local supply and demand. *Source: Bloomberg, ARC Financial Corp.*

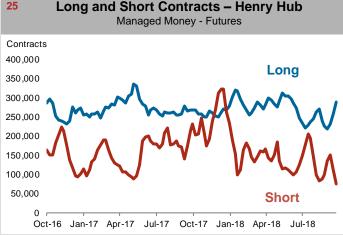

Natural Gas

energyresearch institute

23 Near-Month North American Natural Gas Prices Daily Prices; Rolling 12-Month History

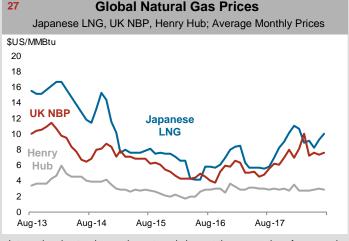

Near-month prices at AECO track Henry Hub prices, the exchange rate and the cost of transportation. Local factors can also affect price. Source: Bloomberg

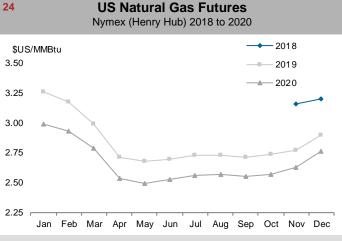

Long contracts take the position that Henry Hub gas price will increase, while short contracts expect a decline.

Source: U.S. Commodity Futures Trading Commission

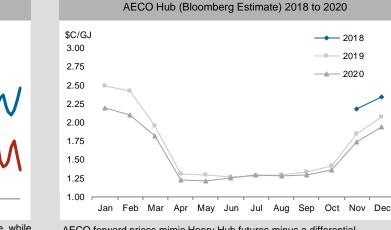

International natural gas prices strongly impact the economics of proposed LNG projects.

Source: Bloomberg, Japanese Ministry of Economy, Trade and Industry

Forward contract prices are plotted against months in the calendar year. Years are distinguished by color and symbol coding. *Source: Bloomberg*

Canadian Natural Gas Futures

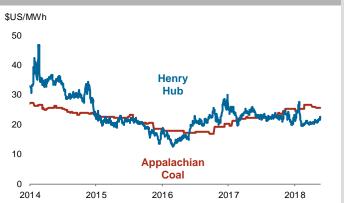

AECO forward prices mimic Henry Hub futures minus a differential.

28 US Coal and Natural Gas Power Generation Cost Converted to a \$/MWh Equivalent

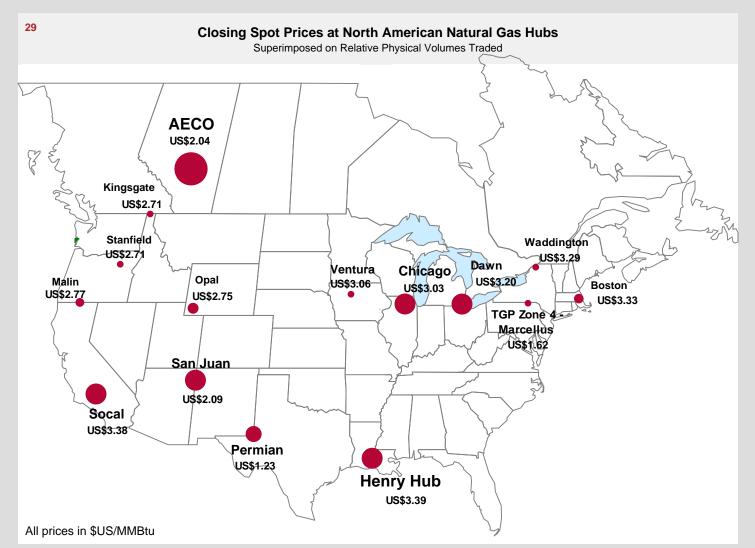

This graph illustrates when it may be economic to begin coal-gas switching in power generation. Average power plant efficiencies are assumed. *Source: Bloomberg*

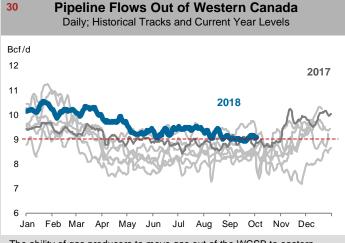

Natural Gas

North America has an integrated natural gas market. Prices are determined by regional supply and demand, and pipeline flows. *Source: Bloomberg*

The ability of gas producers to move gas out of the WCSB to eastern markets and the US is a major factor in local natural gas prices. *Source: Various Pipeline Companies*

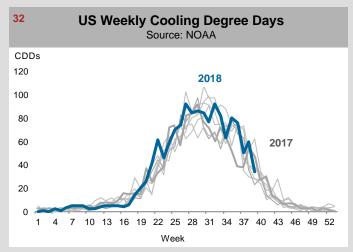

US Natural Gas Exports – Excluding Canada 31 Daily; Historical Tracks and Current Year Levels Bcf/d 2018 9 8 2017 6 5 2016 4 3 2 1 0 Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec

Between exports to Mexico and LNG shipments, the US is growing as a natural gas exporter. Robust US supply growth has driven this trend. *Source: Bentek*

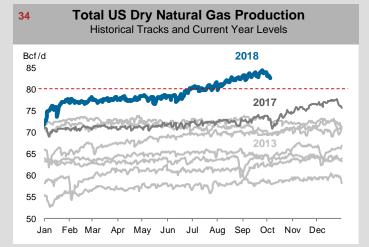

Natural Gas

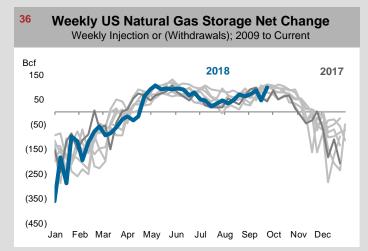

Weekly natural gas demand is directly tied to the weather. The current year is in dark blue.

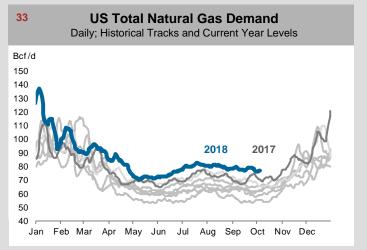

Source: National Oceanic and Atmospheric Administration

US production started ramping up in late 2007 and continues to grow year over year. Source: Bentek

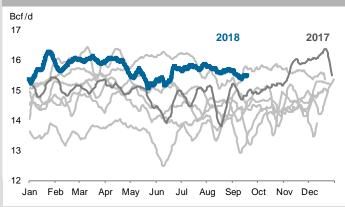

Weekly gas storage reports provide a snapshot of supply and demand. Current year changes are represented by the blue line. Source: U.S. Energy Information Administration

Total US demand fluctuates in the summer and during the winter as weather is an important driver of consumption. Source: Bentek

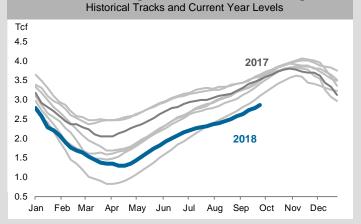

This includes receipts on the TCPL, Alliance, WestCoast and TransGas pipelines.

Total Working Natural Gas in US Storage

Source: Various Pipeline Companies

The EIA reports changes in US natural gas inventories held in underground storage facilities on a weekly basis.

Natural Gas and Other Indicators

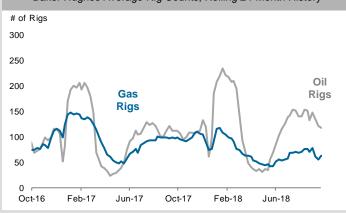

TransCanada Intra-AB Deliveries; Current Year and Historical Tracks

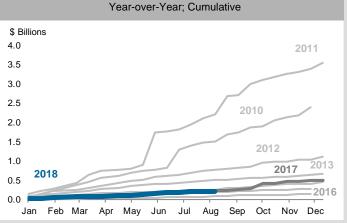

Alberta natural gas demand has grown steadily in recent years, largely driven by new oil sands demand and power generation projects. Source: TransCanada Pipelines

40 Weekly Canadian Oil and Gas Drilling Activity Baker Hughes Average Rig Counts; Rolling 24-Month History

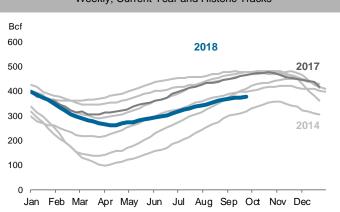

Unlike US drilling activity, Canadian rigs are dispatched seasonally. Capital allocation by operators is driven by views of future oil and gas prices. *Source: Baker Hughes*

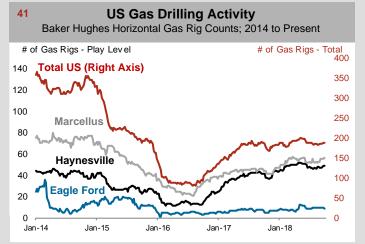

42 Alberta Crown Land Sales – Excluding Oil Sands

Land prices are an important component of F&D costs. In Alberta, sales of petroleum and natural gas rights are held every two weeks. Source: Alberta Department of Energy

Canada's natural gas storage level provides a good metric if the country is well stocked. Abnormally high or low storage can affect the basis. *Source: Bloomberg*

Tracking US gas drilling by major play provides insight into the composition of US gas supply and growth trends. *Source: Baker Hughes*
