

Senior Energy Research Analyst

Based in Calgary Canada, the [ARC Energy Research Institute](#) conducts economic and investment analysis for [ARC Financial Corp.](#) and its stakeholders. ARC Financial Corp. is Canada's largest energy-focused private equity manager.

The Senior Energy Research Analyst will work closely with the ARC Energy Research Institute's Executive Director, Jackie Forrest and Founder, Peter Tertzakian.

The ARC Energy Research Institute is dedicated to researching complex, interrelated trends that influence the energy business, including financial, political, policy, environmental, technological, social, and economic forces. Our research is holistic, covering all the 'neighborhoods' of energy, including clean energy, decarbonization, and oil and gas.

We are seeking an oil and gas-focused research professional. Candidates must have a natural passion and curiosity about energy and oil and gas research. The successful candidate will have the ability to work at both the micro and macro levels of energy research, from analyzing detailed models and data to understanding the big-picture implications. Strong communication skills, both written and speaking, are essential. Must have the ability to work independently, with teams, and interfacing with a wide group of stakeholders, both internal and external to ARC. The successful candidate needs a focus on execution, problem-solving, attention to detail, and delivering to a deadline. While the job is primarily focused on oil and gas, due to the holistic nature of energy systems and the dynamic nature of energy transition, an understanding of clean energy and decarbonization technologies is also important.

The successful candidate must also consider how to create efficiencies for supporting the ongoing delivery of energy market fundamental data, including skills in data management, modeling, and data extraction. Proficiency with technical software, modeling and data management is needed.

Work Experience, Skills and Education

- Bachelor's degree or more, with a preference for engineering, business, economics, finance, or science
- 6-10 years plus of relevant work experience
- Skilled in global and Canadian crude oil and gas market fundamentals and economics
- Exceptional knowledge of Microsoft Office applications and other technical software. Experience with VBA and PowerBI/Tableau (or other visualization software) would be an asset.
- Bloomberg Terminal, GeoScout, and data scraping experience/skills
- Superior quantitative, analytical, communication and presentation skills
- Ability to lead and project manage work programs
- A strong work ethic
- Flexible thinker
- Excellent interpersonal skills

Applicants should have an interest in building a career in Calgary and in energy research. Interested candidates should e-mail a cover letter and resume to:
